Primary energy use

The primary energy use for this property per year is 113 kilowatt hours per square metre (kWh/m²).

How this affects your energy bills

An average household would need to spend **£452 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £38 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2021** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Impact on the environment

This property's environmental impact rating is B. It has the potential to be B.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

This property produces	1.6 tonnes of CO ₂
------------------------	-------------------------------

This property's potential production	1.5 tonnes of CO ₂
--------------------------------------	-------------------------------

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Carbon emissions

An average household produces	6 tonnes of CO ₂
-------------------------------	-----------------------------

Steps you could take to save energy

Step	Typical installation cost	Typical yearly saving
1. Low energy lighting	£35	£38
